

Safety Resource Group

WHO WE ARE

The Rizikon Safety Resource Group provides local, state and federal governments with access to a team of certified safety professionals and framework of best practices proven and tested by the members.

Our government practice comprises safety, risk management, occupational health, environmental, engineering, and loss control professionals.

The Rizikon Safety Resource Group allows each member to improve its workplace health, safety, and environmental risk by having subject-matter professionals support or be a part of an internal safety team.

WHY CHOOSE US

Budget constraints require government entities to find innovative ways to reduce costs while maintaining the service levels constituents expect. And while this is a tall order, you can find the help you need from an organization that specializes in governments like yours - one with the technical expertise and the industry experience necessary to get the job done.

VALUE-ADDED BENEFITS

- Access to all areas of expertise without paying 100% for each specialty
- Overall lower cost due to economies of scale being leveraged
- Access to industry best practices
- Shared learning from fellow government entities. Understanding what works, what does not work, and lessons learned
- Resource for questions and guidance

SAFETY RESOURCE GROUP

This program is designed to offer a cost effective option in support of governmental entities that want to raise the bar, create a healthier and safer workplace, protect the environment, and build a safety culture where people want to work.
